

BURN BRIGHT WITH BIOFUELS!

North American Biofuels is an enterprise developed by the owners of Point Source Solutions and Wy'East Environmental Sciences. We are a group of scientists and engineers that has provided environmental consulting and testing services in Oregon for the past 20 years.

The purpose of North American Biofuels is to recycle waste cooking grease and heating oil in order to provide renewable alternative fuels and useful process byproducts. We are creating a unique business model that relies on recycling unwanted oils, is self-sustaining by powering the process with the biodiesel that we make and converts the process waste to make a usable product.

PRODUCTS

- **Biodiesel**

Our biodiesel will be made from your waste cooking oil that we collect every month. Our product meets the ASTM Standard and will be used for vehicle fueling, heating oil blending, and paint products additive, among others.

- **Straight Vegetable Oil**

Your waste cooking oil will be filtered and dewatered for use in specially equipped diesel vehicles.

- **Rice Bran Oil**

We distribute rice bran oil. It is the healthiest oil for use in salad dressing (nutrition, vitamins, no *transfat*) and as frying oil (higher cooking temps seal in natural flavor without impregnating food with oil). Not only is it the healthiest food oil, but it makes the best biodiesel.

- **Antibacterial Soap**

Glycerin is the major byproduct of biodiesel production. Glycerin is also the major constituent of hypoallergenic soap. We are developing an antibacterial soap with trace recycled silver – a safe and effective alternative to chemical biocide additives.

SERVICES

- **Free used cooking oil collection**

Your waste grease will be processed or recycled into biodiesel and straight vegetable oil to fuel vehicles and heating oil furnaces/boilers. Reliable monthly collection, or as needed for larger quantities, and we provide the containers.

There is no catch to this free service. We offer this service because your waste is valuable to us as a biofuel feedstock.

- **Grease Trap Cleaning**

Our established, licensed, bonded and insured affiliates in the grease trap cleaning business will provide you with excellent service at a reasonable price.

To set up service or get more information, call **Connie Krueger** at **503-295-3610**. Visit our website, **www.na-biofuels.com**.
